

Track-A-Mtaani

Understand approved public-project allocations,
with sources you can check.

A working browser and WhatsApp proof of concept

Understand allocations. Inspect county budget decisions.

The resident's question

“What was allocated to a project in my ward?”

433

pages in the pilot's official
programme budget

Residents can inspect what the county approved for a project and check allocation claims against the official record.

One evidence service, two channels

BROWSER + WHATSAPP

A ward query returns reviewed projects with exact amounts, financial years, and source pages.

English and Kiswahili explanations preserve the financial facts.

Open the official page to inspect the evidence.

Track-A-Mtaani

Supported by the available source.

The claimed allocation matches the reviewed amount for this project, ward, financial year, and document stage. This supports the allocation claim only.

Claim: 2026/2027 | approved | allocation KSh 3,000,000

ROADS HEADQUARTERS

Kianjogu Karaihu

KSh 3,000,000 Allocated

Wamagana Ward · FY 2026/2027 · Approved budget

Explain this project

This is a budget allocation, not proof that money was spent or work completed.

Selected reviewed records only; this is not a complete ward or county project register.

Access and trust

Text replies and a simple mobile layout keep the interaction small. The full source PDF needs more bandwidth.

Browser access needs no account or phone number. Server context expires after 30 minutes of inactivity.

WhatsApp and Twilio process messaging data. No runtime AI provider receives queries or generates figures.

Implementation: [docs/privacy.md](#) | Provider retention is separate from application expiry

Pilot scope and next validation

15 reviewed allocations across
Wamagana, Mweiga and Kabaru

One official document supplies project answers. A second PDF is registered as context only.

This pilot does not track expenditure, accept issue reports, or provide public services.

Next: resident testing and maintained source review.

Participant's original idea; AI tools assisted software development.
